

OPI Manager - now for InDesign CS2

Reliable OPI workflow with HELIOS and Adobe InDesign

Features:

- InDesign features like transparency, drop shadows and soft edges are processed correctly in an OPI workflow
- New feature "Edit HiRes" opens HiRes image directly
- "Package (HiRes)" function for sending documents to externals without OPI (including fonts and HiRes images)
- Easy and fast relinking of images, even in hierarchical folder structures
- Switch easily between layout and HiRes image to place them exactly in the image frame
- Optimized performance during printing against OPI Manager 1.2
- Support for InDesign CS 2
- Support for HELIOS ImageServer UB
